Analysis of energy consumption and energy efficiency in informal settlements of developing countries

Cooperation for development

Polisocial | The social responsibility programme @Politecnico di Milano
Analysis of energy consumption and energy efficiency in informal settlements of developing countries

Analysis of energy conditions in informal settlements of two cities in Latin America (Lima) and in Africa (Lagos), intending to document the policies and best practices that can be transferred or replicated in other cities in the world.

Referent: FEDERICO BUTERA
E-mail: federico.butera@polimi.it

Partner: Politecnico di Milano, Fondazione Politecnico di Milano e UN-Habitat
