Teaching in-the-field

TUS+APE+PLUG Social TV

Strengthening the relationship between the university campus and the neighborhood of Bovisa-Dergano

The proposal intends to reinforce the relationship between the Politecnico Bovisa-Campus and the neighborhood in which it is situated. The aim is to increase the opportunities of interaction and exchange between the life inside the campus and the life of the neighborhood, exploring the ways in which this relationship can be fostered. In the field of service design and communication design, students have developed design strategies and tools able to directly involve inhabitants and associations in a process of community building.
