Renewable Energy Systems
To Activate Recovery
Through the Health sector

- ENERGY EFFICIENCY
- HEALTHCARE
- AFRICA

ABSTRACT

The project aims at investigating efficient energy management for hybrid microgrids, on on-grid and islanded mode duality, in order to strengthen healthcare and community facilities in sub-Saharan Africa.

Testing and demonstrations in one hospital and three health centers in Uganda will allow establishing general guidelines.

PROPOSING TEAM/

Marco Merlo, DENG (PI)
Riccardo Mereu, DENG (project manager)
Irene Bengo, DIG
Veronica Chiodo, DIG
Marco Mauri, DMEC

PARTNERS INVOLVED/

St. Mary's Hospital Lacor

TIMEFRAME/

03/2022 - 06/2023

CONTEXT/

Gulu District, Uganda
