Nature-Based Solutions via retrofitting for Climate Adaptation: a case in the Global South

- nature-based solutions
- retrofitting
- climate adaptation

PROPOSERS

scientific coordinator:

Fabiano Lemes de Oliveira - DASTU

project manager:

Israa Mahmoud - DASTU

DASTU: Silvia Ronchi, Andrea Arcidiacono,
Ahmed H. Eldesoky,
Margherita Nocentini

DABC: Massimo Tadi, Mohammad H. Zadeh,
Tao Dong

DICA: Monica Riva

THE PROJECT

NBSouth explores how nature-based solutions (NBS) can be employed for adaptation to climate change.

Specific attention is dedicated to water management and thermal regulation in the retrofitting of highly-urbanized urban areas. The selected case study is located east of Brasilia, in an area threatened by increasingly severe problems such as water scarcity, drought, urban heat islands and desertification of the Cerrado biome.

PARTNERS

Universidade de Brasília (UnB): Prof. Maria do Carmo de Lima Bezerra; Rubens do Amaral

Compania de Planejamento do Distrito Federal (CODEPLAN)

Secretaria de Desenvolvimento Urbano e Habitação do Distrito Federal (SEDUH): Aline da Nóbrega Oliveira

Secretaria de Meio Ambiente do Distrito Federal (SEMA-DF)

Centro de Cultura e Desenvolvimento do Paranoá e Itapoã (CEDEP)

Associação dos Pioneiros do Paranoá (APP)

CONTEXT

Paranoá, Brasília (Brazil)

START DATE

January 2023
