

PRESTO

PREventive and ecologic Engineering
Strategies for fragile bones:
Towards green healthcare Objectives

- prevention strategies
- osteoporosis
- green healthcare

PROPONENTS

scientific coordinator:

Laura Vergani - DMEC

project manager:

Marco D. Santambrogio - DEIB

Federica Buccino - DMEC

Eleonora D'Arnese - DEIB

Margherita Pero - DIG

Jinou Xu - DIG

Anna Plebani - TTO

THE PROJECT

PRESTO focuses on preventive treatments and minimally invasive techniques that can contain bone fragility and comply with an eco-friendly approach. The project is actively supported by an interdisciplinary network including hospitals and the civil society.

In the long run, the overall expectation of PRESTO is to help reducing the social impact of long hospitalizations and the ecological footprint of the health sector in Lombardy.
