

## THE PROJECT

Through the use of edible and non-edible surpluses and waste, that are generated in the area near Off Campus Cascina Nosedo, BIOLOOP intends to create synergies between local actors, promoting circular practices of transformation, local production of goods and training activities. The experimental aspect of the project focuses on self-production, sustainable distribution and support to urban agriculture, starting from the mapping of flows and the creation of a 'materials library of resources'. The aim is to generate positive impacts, including income support and the reduction of food poverty.

## PARTNERS

La Strada cooperativa sociale (QUBI network); SoulFood ForestFarms Hub Italia; Associazione Terzo Paesaggio; Italia Nostra Onlus - Centro di Forestazione Urbana; Comune di Milano and Food Policy sector; MM SpA; ICS "Marcello Candia" (public school)

## CONTEXT

Off Campus Cascina Nosedo  
Corvetto-Chiaravalle area (Milan)

## START DATE

October 2023

# BIOLOOP

Experimental lab to support local, circular and participatory economy practices

- urban surplus
- materials library
- circularity

## PROPONENTS

*scientific coordinator :*

Matteo Clementi - DASTU

*project manager:*

Paola Caputo - DABC

Valentina Dessi - DASTU

Giancarlo Paganin - DASTU

Barbara Del Curto - CMIC

Romina Santi - CMIC

Flavia Papile - CMIC

Paola Garrone - DIG

Giulia Bartezzaghi - DIG

Stefano Quaglia - DIG
